

# \*\*\* YOUR COMPUTER CALENDAR \*\*\*

CONGRATULATIONS!!! You are now the proud owner of a program that will enable to become more efficient so you have more time to work with ADAM.

YOUR COMPUTER CALENDAR will allow you to save four messages per date over a four month period as well as create a calendar for any month between 1800 and 2400 A.D. The messages you store can be viewed on the screen or printed within a calendar. The program is menu driven using Smartkeys.

YOUR COMPUTER CALENDAR will create a five block message file with the file name "msg". YOUR MEDIA MUST HAVE 5 BLOCKS FREE FOR CREATING THE FILE THE FIRST TIME THE PROGRAM IS RUN.

YOUR COMPUTER CALENDAR uses all but a few hundred bytes of available memory so all REM statements have been removed. Here's a few notes about the program.

\* The pokes for sound are at 3000 and they are not the regular sound pokes; instead, they set up access to noise codes. Pokes 240 to 255, 208 to 223, 176 to 191 and 144 to 159 are volume. All other numbers from 128 are various types and pitches of sound. Each group of volume codes control the sounds immediately preceding it.

190 Print Calendar Routine  
560 Add or alter messages  
1140 View messages routine  
1390 Clear or advance 1 month  
1670 Print calendar with messages  
1780 Calculate the first day of the month  
1840 Start Screen  
1990 Menu  
2190 First run or clear all messages  
2570 Sound routines  
2600 End routine

\* Pokes found in this program:  
16953 - cursor character (0 removes cursor)  
16149/16150 - allows you to poke 64885  
64885 - last keyboard key pressed (0 clears)  
17291 - cursor flash speed  
159 - text FLASH speed

17059/17115/17126 - Screen / text color  
16135 - pause (control s) - 32=spacebar  
17201 - top margin for view window  
17198 - # of lines to clear for view window  
CALL 17197 - sets up window

Messages are limited to 9 letters, numbers or characters. An 'empty message' must begin with a period (46).

IF FOR ANY REASON THE PROGRAM ABORTS RESULTING IN A 'msg' FILE LESS THAN 5 BLOCKS, YOU MUST 'DELETE' THE 'msg' FILE, CORRECT THE PROBLEM AND START AGAIN.

For some reason, ADAM will not allow you to write more than an existing file will hold.

ENJOY!!!

Bob Tarnowski

YOUR ADDRESS BOOK will enable you to keep track of up to 150 people or places per book and up to 14 books! Each member of your family can have their own address book file plus files for business, clubs and organization members, services, etc. The program contains a main menu and extensive use of the SmartKEYS. The program can be listed - I hope you will find many of the routines useful in your own projects. Enjoy!!

---

'RUN HELLO' or 'brun addressbk' to begin the program which has been bsaved. YOUR ADDRESS BOOK begins with the menu:

LIST - will enable you to list your address book by name and address, name and phone #, flag A, flag B or all data with the option to view on screen or to print. You can pause the listing by pressing the <SPACEBAR>. All listings are in alphabetical order.

SEARCH - will enable you to search for listings by last name or any number of letters. In other words you can search for 'ADAMS' and all ADAMS will appear or search for 'AD' and listings beginning with AD will appear in alpha order.

ADD - lets you add listings to YOUR ADDRESS BOOK. When you start a new book, you will be asked to name the two flags which are used to categorize the listings e.g. 'XMAS LIST', 'FAMILY', 'BUSINESS', 'MEMBER', 'OFFICER', etc. YOUR ADDRESS BOOK can sort and list by flag A or flag B. The flag is 'marked' by entering a 'Y' by the flag name.

DEL - will permit you to delete a listing.

LOAD - will let you load a file into memory. The files will be cataloged on the screen (the HELLO and addressbk file will not appear) and you can select your file using the arrow keys. The first time you use a file you have the option to load it first or wait and save it.

AN EXISTING OR WORKING FILE MUST ALWAYS BE LOADED FIRST BEFORE  
ADDING OR SAVING TO THE FILE TO PREVENT ERASING PREVIOUSLY  
RECORDED DATA!!!

SAVE - will enable you to save your listings in a file. If it is to be a new file which was not previously loaded, YOUR ADDRESS BOOK will list the files for your selection.

\*\*\* WARNING \*\*\* There is a possibility that ADAM will lock up at this point - it is therefore suggested that if you have a large list, type 15 or 20 at a time and save them. Files previously loaded will automatically SAVE to the same file. After starting a file rename it. Type 'RENAME <OLD filename>,<NEW FILENAME>. i.e. RENAME AAA,FAMILY <RETURN>.
